

CURTIS ROAD INTERCHANGE CONSTRUCTION BEGINS JULY 31

A four-month project to rehabilitate the Curtis Road Interchange Bridge over Interstate 184 (the Connector) will repair badly deteriorated pavement, extend the life of the structure and provide a smoother ride for motorists.

Traffic impacts include:

- Curtis Road will be reduced to one lane in each direction in the interchange area.
- Motorists will be unable to make left turns to access Connector on-ramps from Curtis Road.
- Curtis Road off-ramps from the Connector will be closed to truck traffic. Other vehicles may use the ramps, but motorists should expect delays.
- I-184 (the Connector) will have intermittent lane restrictions during non-peak travel times. On weekdays, all inbound lanes will remain open during the morning commute (6 a.m. - 9 a.m.), and all outbound lanes will be open during the afternoon commute (3 p.m. - 7 p.m.). At least one lane in each direction will remain open on I-184 throughout the project.
